EDUCATION

National Institute of Technology Durgapur — Durgapur, India
Bachelor of Technology in Metallurgical and Materials Engineering — May 2025

- Coursework: Data Structures and Algorithms, Compiler Design, Computer Networks
- Organisations: Indian Society for Technical Education (ISTE)

SKILLS

Programming	JavaScript, TypeScript, C, C++, SQL, HTML, CSS
Frameworks & Databases	React.js, Next.js, Node.js, Express.js, Tailwind CSS, PostgreSQL, Firebase, MySQL
Tools & Other Skills	Docker, Git/GitHub, GitHub Actions (CI/CD), REST APIs, SEO, Google Analytics

EXPERIENCE

Assistant Manager – Technology Excellence — Dolvi, Navi Mumbai, India
JSW Steel — July 2025 – Present

- Analyzed production datasets from SAP and MES to identify performance bottlenecks and optimization opportunities.
- Built KPI dashboards and automated reports for operational analytics.
- Performed RCA and data analysis to identify process gaps and optimize workflows.
- Collaborated with cross-functional teams on system enhancements & feature improvements.

Software Development Intern — London, UK — Remote
Coditioning (coditioning.com) — Oct 2024 – June 2025

- Built end-to-end web features using React.js, Next.js, TypeScript, and CSS across client-side and server-side workflows.
- Migrated the codebase from React to Next.js, implementing server-side rendering, static site generation, dynamic metadata, and SEO optimizations.
- Debugged and optimized application logic, API integrations, rendering behavior, and responsive UI across the stack.
- Used Docker and AI-assisted development tools, including GPT models and custom GPT workflows, to review code, generate reusable components, and improve implementation quality.
- Integrated Builder.io for dynamic blog content and optimized content delivery, contributing to an 80% increase in search visibility.

Web & Tech Head — NIT Durgapur, India
ISTE Students' Chapter (istenitdgp.com) — Feb 2022 – May 2025

- Led a 15-member team to develop and deploy scalable web applications, optimizing frontend performance, improving user experience, and managing feature development, code integration, and production releases for 5,000+ users.

PROJECTS

DevMatch: Built a developer matchmaking platform; defined core features, improved user flows, and implemented real-time interaction, focusing on engagement and usability. (Preview)

JK-bros: Developed a logistics platform; designed user workflows and optimized delivery experience using React, Firebase, and Node.js. (Preview)
